

We have had a few questions about Early Childhood Registration week. Registration is January 22 - 25, 2019 from 9 a.m. to 3 p.m. at the elementary schools. The following questions and answers apply to new four and five year students.

1) Where do I register my child?

Parents need to register their children at the school their children are zoned to attend (home school).

2) Do I need to register my four-year old (Child Development/Montessori) student for Kindergarten?

Parents of current four-year old students do not have to register their child for Kindergarten. Current information on four-year old students will roll over to their home school in PowerSchool for next year.

3) What if I want my child to attend another school than my zoned school? Do I go to the school I want my child to attend?

Parents will register their child at their zoned school. If parents want their child to attend a different school next year other than their zoned school, they will have to complete an In-District Transfer Form. The In-District Transfer forms will be available on-line April 1, 2019.

This is really two processes—Registration at your zoned school and Transfer Request from the Office of the Assistant Superintendent for Administration.

4) I have an older child that has permission to attend another school other than our zoned school. Now I have a young child I am registering. What do I do to get my younger child in the same school as my older child?

First, you will need to register your younger child for the four-year old Child Development program or five-year old Kindergarten program at the school your child is zoned to attend. After April 1st, you can complete an on-line request an in-district transfer to the school your older child attends.

5) If I receive permission for my child(ren) to attend another school, will the district provide transportation for my child(ren)?

You will need to provide transportation for your child if he/she gets permission to attend another school other than his/her zoned school.

6) What are the school fees for the Child Development program?

There are no school fees or supplies needed for the Child Development program.

7) I registered my child for the Child Development program last year but my child did not attend the program. Do I need to register my child for Kindergarten this year?

Yes, you will need to go to the school your child is zoned to attend and complete the registration for Kindergarten.
