

Permission to View the Solar Eclipse

On Monday, August 21, 2017, the moon will pass in front of the sun, casting its shadow across all of North America. This will be the first total solar eclipse visible in the contiguous United States in 38 years. Residents in Greenwood, South Carolina will be in the path of totality, which means the total eclipse will be visible here. The total eclipse will occur at 2:39 p.m. for approximately two and one-half minutes. We plan to study the solar eclipse and ways students can safely view it.

We are requesting permission for your child to view the solar eclipse.

Yes _____ I give my child permission to view the solar eclipse.

No _____ I do not give my child permission to view the solar eclipse.

Student: _____

Grade: _____

School: _____

Parent/Guardian: _____

Date: _____
